Dear sir/ madam

RE: INTRODUCING A ROBUST SCHOOL MARKS ENGINE

With great pleasure, we hereby introduce to you our technology solution named "BIGEZO". We built this technology as a solution to help parents access their children's exam-marks remotely as often as the school does exams / tests all through the term. The platform also helps the school administration to bulk design and generate report PDFs offline for students at a terrific speed for printing.

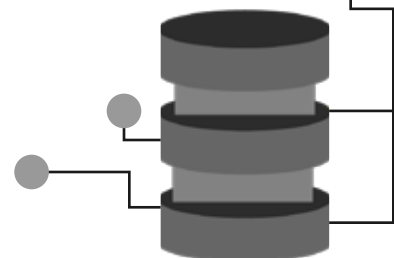

Some Standard functions of the technology

ONLINE (phone, PC, tab - Web Application)

- Parents can access their child's marks online (Phone, PC, or tab)
- Parents can send feedback and queries regarding the exam results.
- Parents can Download student's report in PDF format.
- School admin can upload all class marks at once (in an Excel file) without positions, averages, aggregates, and comments. These are auto-generated by the bigezo algorithm. You only choose the settings (**passmark**, **announcements**, **requirements**, **D1 starts from... etc.**) of your choice per exam.

OFFLINE (Desktop Application)

- A powerful reports designer.
- Bulk students' reports PDF generator.
- **OUTPUT SPEED:** 20 reports per second.
- Marks database engine.
- Marks Grading algorithm.
- Other customizations e.g. passmark, announcements, and requirements.

COST

UGX 3,000 / child/ term

To use the technology, please visit www.bigezo.com/welcome.jsp and open an account.

PREMIUM PACKAGE

We offer a customization of this platform for a school that wishes to have the premium package instead. The customization includes the following services / system functionalities.

- All the standard bigezo application functions **plus the following:**
- Customized school domain name e.g. www.yourschool.com. This can also be accessed directly from your official school website if you have one.
- Your customized subjects in addition to the core compulsory subjects.
- Your own school grading instead of the UNEB standard grading.
- Profile photos for all your students (Photoshoot, editing the photos, uploading them to the online platform to be used in the students' reports).
- An SMS Alert to each parent after every new marks release
- Free staff and parents' training on usage
- Cyber Security of the school database

COST **UGX 10,000** / child/ term

To open the premium account, our team shall meet with you on appointment to discuss the details and the other terms of work, as well to discuss and sign the corresponding legal contract to ensure trust and fruitfulness. We shall be greatly honored to hear from you.

Thank you

Yours in service
Alfred Ochola
CEO, Aysh Inventions Ltd
